

# DIAMOND<>FURR® Pat.

## C.I. LATH ATTACHMENT SYSTEM

PRODUCT ID: **DFXS-2375**

**EXPANSION JOINT for 2" RIGID INSULATION**

**DESCRIPTION:** The Diamond-Furr Termination Trims for Continuous Insulation (CI) Systems are designed specifically for projects using 3-coat plaster over rigid insulation in compliance with the new energy code criteria. Diamond-Furr's Expansion Joint trims eliminate 100% of the fastener penetrations through the WRB while providing an uninterrupted 3/8" furring for superior lath embedment.

The Diamond-Furr *Expansion Joint* (pt# DFXS-2375) is designed to be installed at the floor lines like conventional expansion joints. It has a built-in furring strip which extends 3/8" beyond the rigid insulation and creates an uninterrupted 3/8" furring as well as a flexible connection point for metal lath. The metal lath is secured using tie wire through the provided attachment holes and finished with a butterfly tie. The Diamond-Furr Expansion Joint trim effectively eliminates 100% of the fastener penetrations through the WRB.

The Diamond-Furr *Expansion Joint* works in conjunction with the Diamond-Furr C.I. System *Furring Strips* which eliminate 55% penetrations through the moisture barrier in the field. We recommend using the complete Diamond-Furr C.I. System for the best possible protection against moisture intrusion, superior lath embedment, minimized thermal bridging and significantly reduced exposure to moisture intrusion liability.

**MATERIAL:** 24 GA Galvanized Steel G90, Also available in Stainless Steel – Call for Details  
**ASTM:** A653, LFQ, C1063, C841, C847, A653, C1047, A924, Fed. Spec QQ-S-775-D

**DFXS-2375 EXPANSION JOINT**
