

'ELIMINATOR' CHANNEL SCREEDS Pat.

PRODUCT ID: BXM 875-50 (1/2" reveal), **875-75** (3/4" reveal), **875-100** (1" reveal)

DESCRIPTION: The 2-piece Eliminator Trim is a revolutionary new approach to achieve beautiful architectural reveals both vertically and horizontally while eliminating all of the common concerns and problems. The trim can be used with cement plaster, drywall, direct applied, EIFS and more.

Part A is a receiver track which is fastened directly through the bottom of the channel and Part B is a cover plate reveal that securely snaps into place. The Eliminator system provides crisp, precision terminations, fully welded intersections and answers all of the typical concerns with the use of standard plaster channel screed trims.

FEATURES

- Product is fastened through the Receiver Channel
- No Nail Flanges
- Part B (Reveal Insert) installed after stucco coat is dry
- Fully welded Intersections
- Reusable, recycled plastic inserts are used to protect the Receiver Channel
- Added "Brown Ground" Screed flange
- Receiver Channel joints and fasteners can be thoroughly caulked and sealed

BENEFITS

- Reduces moisture barrier penetrations by 50%
- Eliminates common cracking at the edge of nail flanges
- Eliminates need to mask off the reveals
- Eliminates stained or scratched reveals
- Eliminates the cost of labor to remove the glue residue left by masking tape
- Wet cement & stucco never comes in contact with finish product
- Reveal flange is never covered with stucco which results in crisper, cleaner architectural lines
- Improved moisture protection by all joints being staggered
- Greatly reduces potential for moisture intrusion
- Practiced Sustainability
- Quick Insertion and Removal lowers labor cost
- Helps reduce overall material usage by controlling the brown coat thickness
- The Reveal Insert covers all caulking for the cleanest finish possible

MATERIAL: Aluminum Alloy 6063 T5 **THICKNESS:** Nominal .050 **ASTM:** B 221
LENGTH: Standard: 10 ft.
FINISH: Standard - Clear Anodized (Architectural 200R1 med. Etch AAM32C10A21)
 Also available: Chem-Film a.k.a. 'Paint Grade', Custom anodized, Kynar ® fluoro-polymer coating
