

Moisture Resistant 'T' Mold

PRODUCT ID: MRT

Compare to: TRM

DESCRIPTION: The 'T-Mold' is typically used to create a reveal at the intersection of a soffit and wall. We offer the T-Mold in extruded aluminum as well as a brake formed trim as shown here. The Brand X Metals brake shape design (MRT) eliminates the ability for moisture to get trapped within the trim like the traditional design. The brake shape T-Mold can be fabricated with custom ground sizes and nail flange sizes. If your project calls for standard sizes, we recommend using our cost effective extruded aluminum TRM trim which is available with a reveal size up to 6".

MATERIAL /

THICKNESS: 040 Aluminum, 26 GA Galvanized Steel, #4 Stainless Steel and 16 oz. Copper

ASTM: A653 LFQ, C1063, B209, B69

LENGTH: Standard: 10 ft.

COMMON SIZES:

GROUND SIZE (DIM. A)	REVEAL (DIM. B)
1/2" = 50	3/4" = 75
5/8" = 625	1" = 100
3/4" = 75	1-1/2" = 150
7/8" = 875	2" = 200
1" = 100	2-1/2" = 250
1-1/2" = 150	3" = 300
	3-1/2" = 350
	4" = 400
	4-1/2" = 450
	6" = 600

PART NUMBER:

MRT (Dim A) – (Dim B)
