

## ARCHITECTURAL EXTRUDED ALUMINUM TRIMS FOR STUCCO AND DRYWALL

---

### - STREAMLINE TRIM -

#### It's GREEN and Saves You \$GREEN

Brand X Metals is dedicated to providing the industry with top quality products while striving to preserve the world's natural resources. Our packaging is 100% recyclable and our extruded aluminum products consist of 75% recycled material (50% Post-Industrial content and 25% Post-Consumer content) which helps projects qualify for LEEDS Credits. In addition, all excess materials from the manufacturing and fabricating process are captured and recycled.

Our NEW *Streamline Channel Screed* not only starts with 75% recycled material, the finished product requires 20% less material due to the shorter nailing flanges. Less material equates to less money (\$200/1,000LF savings) and less impact on the environment!

Our Streamline Channel Screed offers several more advantages:

- Better crack control with less nail flange material = \$ Savings!
- The 'Over the Lath' Installation = Moisture drainage capability
- Better drainage capability = Lower potential for moisture intrusion and damage
- The 'Over the Lath' Installation = Straighter finished walls over wood framing

#### PRODUCT SPECIFICATIONS:

**MATERIAL:** Aluminum Alloy 6063 T5 **THICKNESS:** Nominal .050 **ASTM:** B 221  
**SIZES:** Standard: length: 10 ft.; 1/2" & 7/8" ground, 1/2" to 4" reveals  
**FINISH:** Standard - Clear anodized **ASTM:** Architectural 200R1 med. Etch AAM32C10A21  
Also available: Alodine® Paint Grade finish – a.k.a. 'chemical conversion', custom anodized finishes & Kynar® brand paint.

**OPTIONS:** **Factory Masking** - Channel screeds up to 1-1/2" are available with a manufacturer applied protective vinyl tape over the reveal  
**Venting** - All channel screeds from 1/2" width to 4" are available with venting  
**Intersections** – notched and mitered/welded intersections per your specifications  
**Radius** – Channel screeds can be bent to meet your required specifications
