

DRYWALL CUSTOM END CAPS

PRODUCT ID: DEC - Custom

DESCRIPTION: Brand X Metals' custom Drywall End Cap (DEC) trims can be used at the top or end of wall partitions to give a clean anodized or painted finish across the width of the partition. The DEC is secured in place using fasteners. The tape bead on both flanges allows the nailing flange to be covered by joint tape and compound and leaves only the face of the trim exposed. Custom sizes can be fabricated as a brake shape to meet your project's specifications.

Slip-On Caps can also be fabricated to meet your needs. (See: Part # SOC)
