

WINDOW SURROUNDS

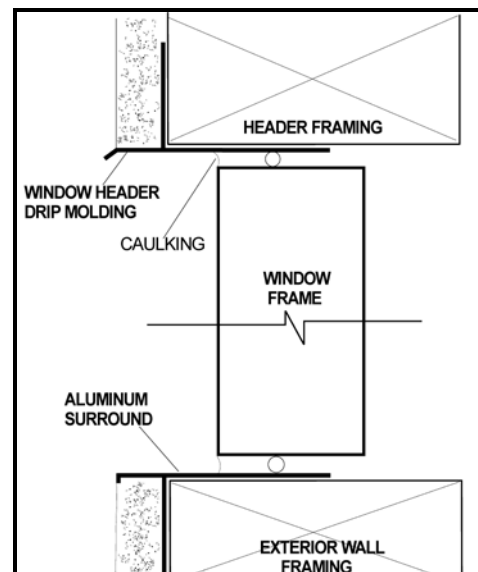

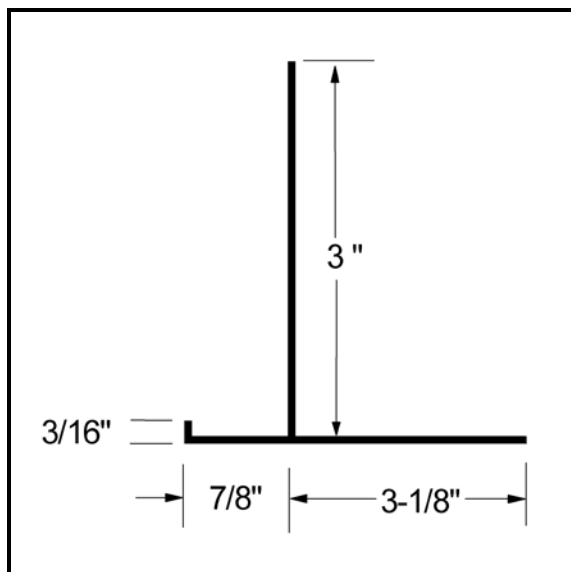

PRODUCT ID: **WS – 400**

Compare to: FRWM

DESCRIPTION:

Brand X Metals, Inc. offers several plaster termination treatments for window openings. Our Window Jamb and Sill (pt # WS-400) is part of our *Window Surround System* and provides several benefits to the customary method of running 3-coat plaster in the return for recessed windows.

Our WS Series allows flexible positioning of the window frame which eliminates additional lath and plaster materials as well as labor costs for the recessed return and creates a smooth metal to metal caulk joint which results in the best possible condition for preventing leaks.

MATERIAL: Aluminum Alloy 6063 T5 **ASTM:** B 221

THICKNESS: Nominal .050

LENGTH: Standard: 10 ft.

FINISH: Standard - Clear Anodized (Architectural 200R1 med. Etch AAM32C10A21)

Also available:

- Alodine® or Chem-Film a.k.a. 'chemical conversion'
- Custom anodized finishes
- Kynar® fluoro-polymer extrusion coating
