

ARCHITECTURAL EXTRUDED ALUMINUM TRIMS FOR STUCCO AND DRYWALL

Re: LEED information and Recycling Content:

Brand X Metals, Inc. manufactures and fabricates extruded aluminum trims and is dedicated to providing builders with top quality products while striving to preserve our natural resources. Our aluminum products as well as our packaging are 100% recyclable and all excess materials that occur during the manufacturing process are recycled locally.

All of Brand X Metals' "6063" aluminum is manufactured with post-consumer and post-industrial content which helps your project qualify for LEED Credit MR 4.1 and 4.2.

The components are:

- 50% Post-Industrial content
- 25% Post-Consumer content
- 25% Primary aluminum

Recycled raw materials are received from regional suppliers while the extraction of primary content comes from Henderson, Kentucky and Commerce, Texas. The point of manufacturing is Ontario, CA

Virtually all products shipped from our facility do not require additional field painting. This results in No Hazardous Waste, No VOC's and No Heavy Metals.

For any additional information, please contact us at 888-856-5434.
