##### To Prevent Injury and Equipment Damage:

- **CAUTION:** Cutting the product could result in **damage or harm to persons and equipment.**

##### Warranty Information:

- **NOTICE:** The product warranty is **VOIDED** if instructions are not followed.
- **Warranty Information:** We stand behind the quality and reliability of our Cease Fire Self-Closing Vents. In the unlikely event that a vent closes prematurely due to age or a faulty sensor, **we will replace the affected parts** under our product warranty.

## Product Disclaimer

Cease Fire Self-Closing Vents are designed to enhance your property's defense against wildfires by helping to prevent the entry of embers and flames through ventilation points. It is crucial to understand that **Cease Fire Vents are intended to work in conjunction with a comprehensive home hardening strategy**, which includes other fire-resistant building materials and practices.

While our vents are engineered for superior performance in extreme heat, **Cease Fire Vents do not claim to stop or prevent structural damage** to your home or property during a wildfire event. The extent of fire damage can vary significantly based on numerous factors, including fire intensity, surrounding vegetation, topography, and the overall fire resistance of the entire structure. For maximum protection, always consult with fire safety professionals and adhere to local building codes and recommendations for wildfire-prone areas.
